# ABOUT US

Neon Light House is a pioneering company established in 2013, specializing in the design, manufacture, and distribution of high-quality LED lighting solutions. Over the years, the company has grown to become a trusted name in the LED lighting industry, known for its innovation, reliability, and customer-centric approach.

## Vision

To illuminate the world with sustainable and energy-efficient LED lighting solutions, enhancing the quality of life and promoting environmental stewardship.

## Mission

- To deliver top-notch LED lighting products that meet and exceed customer expectations.
- To continually innovate and incorporate the latest technologies in our product offerings.
- To provide exceptional customer service and support.
- To contribute to a greener planet by promoting energy-saving and Eco-friendly lighting solutions.

## Products and Services

Neon Light House offers a wide range of products and services, including:

**Residential LED Lighting:** Solutions for homes, including bulbs, strips, and fixtures.

**Commercial LED Lighting:** Tailored lighting for offices, retail spaces, and industrial environments.

**Architectural Lighting:** Customized lighting designs for buildings and landmarks.

**Outdoor and Landscape Lighting:** Durable and energy-efficient lighting for outdoor spaces.

## Goals

### Expand Market Reach:

Increase presence in global markets through strategic partnerships and distribution channels.

### Product Diversification:

Develop new products to cater to emerging market trends and customer needs.

### Sustainability:

Enhance sustainability practices, aiming for a significant reduction in carbon emissions by 2025.

### Technological Advancements:

Invest in research and development to stay ahead in the LED lighting industry.

### Customer Experience:

Continuously improve customer service and support to ensure the highest levels of satisfaction.

## A. Pairing Fixture With The Remote

- Turn on the power of the desired light/lights to pair in a group.
- Press a number from 1 to 99 (which will be the group number) once and then hold the power on button (red button) until the light/lights blink thrice.
- Once the light/lights blink thrice, those lights are paired to that specific group number.
- You can create up to 99 such groups, one individual group can control up to 99 luminaries.

## B. Setting The Timer

- Select the desired group for which you want to set the timer by pressing the group number.
- Press the ID button.
- Immediately then press the desired number of minutes after which you want to turn on/off the lights. You can enter a numeric value from 1 to 99 where 1 stands for 10 minutes and 99 stands for 990 minutes.
- Immediately then press the Timer on/off button post entering the desired minutes.
- The light then blinks once to indicate that it has accepted the command.

### Note: -

- For Instance: If you press 1 then the timer is set to 10 minutes; if you press 12 then the timer is set to 120 minutes.
- To cancel the timer follow the same steps used to set timer and enter 0 while entering the number of minutes, the timer is then cancelled.
- Only one command either to turn on or to turn off can be given once, if two commands are given the second command overwrites the first one.
- Immediately then press the Timer on/off button post entering the desired minutes.
- Do not turn off main power once a timer command is given, if turned off the timer is cancelled.

## A. Pairing Fixture With The Remote

- Turn on the power of the desired light/lights to pair in a group.
- Press a number from 1 to 99 (which will be the group number) once and then hold the power on button (red button) until the light/lights blink thrice.
- Once the light/lights blink thrice, those lights are paired to that specific group number.
- You can create up to 99 such groups, one individual group can control up to 99 luminaries.

## B. Setting The Timer

- Select the desired group for which you want to set the timer by pressing the group number.
- Press the ID button.
- Immediately then press the desired number of minutes after which you want to turn on/off the lights. You can enter a numeric value from 1 to 99 where 1 stands for 10 minutes and 99 stands for 990 minutes.
- Immediately then press the Timer on/off button post entering the desired minutes.
- The light then blinks once to indicate that it has accepted the command.

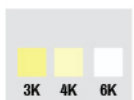

### Note: -

- For Instance: If you press 1 then the timer is set to 10 minutes; if you press 12 then the timer is set to 120 minutes.
- To cancel the timer follow the same steps used to set timer and enter 0 while entering the number of minutes, the timer is then cancelled.
- Only one command either to turn on or to turn off can be given once, if two commands are given the second command overwrites the first one.
- Immediately then press the Timer on/off button post entering the desired minutes.
- Do not turn off main power once a timer command is given, if turned off the timer is cancelled.

# M20 REMOTE

## A. Pairing Fixture With The Remote

- Turn on the power of the desired light/lights to pair in a group.
- Press a number from 1 to 99 (which will be the group number) once and then hold the power on button (red button) until the light/lights blink thrice.
- Once the light/lights blink thrice, those lights are paired to that specific group number.
- You can create up to 99 such groups, one individual group can control up to 99 luminaries.

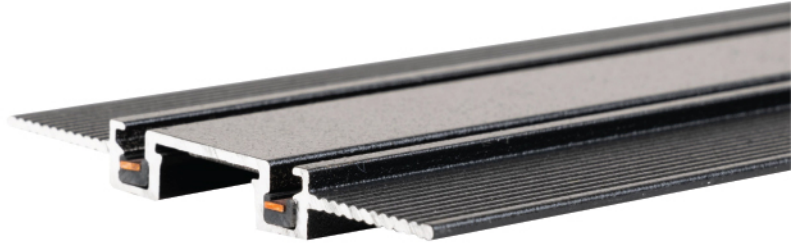

## B. Setting The Timer

- Select the desired group for which you want to set the timer by pressing the group number.
- Press the ID button.
- Immediately then press the desired number of minutes after which you want to turn on/off the lights. You can enter a numeric value from 1 to 99 where 1 stands for 10 minutes and 99 stands for 990 minutes.
- Immediately then press the Timer on/off button post entering the desired minutes.
- The light then blinks once to indicate that it has accepted the command.

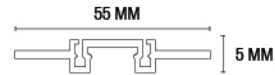

### Note: -

- For Instance: If you press 1 then the timer is set to 10 minutes; if you press 12 then the timer is set to 120 minutes.
- To cancel the timer follow the same steps used to set timer and enter 0 while entering the number of minutes, the timer is then cancelled.
- Only one command either to turn on or to turn off can be given once, if two commands are given the second command overwrites the first one.
- Immediately then press the Timer on/off button post entering the desired minutes.
- Do not turn off main power once a timer command is given, if turned off the timer is cancelled.
